Born: 2004 | Marital status: Single | Military service: Educational exemption

PROFESSIONAL SUMMARY

Front-End Developer with over one year of professional experience building **React**, **Next.js** and **TypeScript** applications. Delivered features, UI improvements and bug fixes for business-focused software. Contributed to **Asman Software**, used by approximately 30 automotive dealerships, and independently designed and built **full-stack projects**. Collaborative, quick to learn, and comfortable owning tasks without close supervision.

WORK EXPERIENCE

Front-End Developer | MRB Group

May 2025 – Sep 2026

Karaj, Alborz

Product: Asman Software — Automotive Dealership Management Platform Demo

- Developed and maintained front-end features for **Asman Software**, a dealership management platform used by approximately **30 dealerships**.
- Delivered features across four modules: **parts-order tracking** (search, status filters, detail views), **customer follow-up**, **internal evaluations** and **appointment scheduling**.
- Independently completed assigned tasks covering **new features**, **bug fixes**, **UI improvements** and progress reporting.
- Built **reusable React components**, **responsive screens**, **forms**, **data tables**, search and interactive filters within the existing architecture.
- Integrated **REST APIs** and managed **loading, error and empty states** to keep workflows reliable.
- Collaborated with the team to integrate features and resolve cross-module UI issues.

SELECTED PROJECTS

Rudo Quest — Collaborative Task Management

Demo Repo

Next.js Route Handlers · **Supabase**. Designed and developed a collaborative task manager with **team workflows**, task organization and **full-stack** integration.

Wavify — Music Streaming Platform

Express · **PostgreSQL**. Built a **full-stack** music platform: interface, **backend services** and core **streaming features**.

Indigo Accessories — E-commerce Website

Demo Repo

Next.js Route Handlers · **Supabase**. Built an **e-commerce** application end to end: storefront UI, **APIs** and **database integration**.

Asia Khodro — Vehicle Deposit Portal

Demo

Commercial project · **MRB Group**. Solely implemented the **front end** of a vehicle deposit portal with **validated forms** and a **multi-step submission flow**.

Watch Store — RTL Watch E-commerce

Demo Repo

Next.js · **TypeScript** · **PostgreSQL**. Built an **RTL** watch store with **product comparison**, wrist preview, cart, simulated checkout and **admin dashboard**.
