PROFESSIONAL SUMMARY

Front-End Developer with 1+ years of professional experience building web applications using React, Next.js, and TypeScript. Experienced in delivering features, UI improvements, and bug fixes for business-oriented software products. Contributed to Asman Software, an automotive dealership management platform used by approximately 30 dealerships, and independently built full-stack side projects to strengthen product, UI, and integration skills.

WORK EXPERIENCE

Front-End Developer | MRB Group — May 2025 – Sep 2026
Karaj, Iran

Product: Asman Software — Automotive Dealership Management Platform

- Developed and maintained front-end features for Asman, a web-based dealership management platform used by approximately 30 automotive dealerships.
- Implemented features across four business modules: parts-order tracking, customer follow-up, internal evaluations, and customer appointment scheduling.
- Independently handled assigned development tasks, including new feature implementation, bug fixes, UI improvements, and task progress reporting.
- Built reusable React components, responsive interfaces, forms, data tables, search functionality, and interactive filters within the project's existing architecture.
- Integrated RESTful APIs and handled asynchronous UI states, including loading, error, and empty states.
- Collaborated with team members to deliver features, resolve integration issues, and maintain consistent application behavior across modules.

SELECTED PROJECTS

Rudo Quest — Collaborative Task Management — rudo-quest.vercel.app
Next.js Route Handlers · Supabase · Independent Full-Stack Project

Designed and developed a collaborative task-management app to gain hands-on product-building experience across app modules and workflows.

Wavify — Music Streaming Platform — wavify.ir
Express · PostgreSQL · Independent Full-Stack Project

Designed and developed a music platform as an end-to-end practice project covering UI, backend integration, and real product features.

Indigo Accessories — E-commerce Website — indigo-accessories.vercel.app
Next.js Route Handlers · Supabase · Independent Full-Stack Project

Designed and developed a full-stack e-commerce project to practice implementing common product features found in modern web apps.

Asia Khodro — Vehicle Deposit Portal — asiakhodro9117.ir
Commercial Project · MRB Group

Implemented the complete front-end of an online vehicle deposit payment portal, including forms, validation, and a clear multi-step flow.
